Overview

The world is changing. In the last decade, a number of previously-stable democracies have seen their political institutions erode – in some cases into dictatorship. Mirroring this trend, the 2020 United States presidential election saw accusations of widespread voter fraud from the defeated incumbent, which culminated in an insurrection on the U.S. Capital. What drives democratic backsliding and determines whether a country’s politics are subject to democratic institutions versus something else? And how are political decisions made by citizens and political leaders in the absence of democratic institutions, such as checks and balances or legitimate elections? This course is designed to study these questions, using a combination of rational choice theory and cutting-edge empirical research. Students should be juniors or seniors with prior training in basic microeconomics and positive political economy. It is also helpful to have a background in basic game theory and econometrics, although it is not necessary.

Course goals and objectives

In this course:

1. Students will learn about early modern states, including how and when they first emerged.
2. Students will apply the tools of political economy to understand why some early states evolved into democracies while others saw power remain concentrated among a dictator, monarch, or small group of elites.
3. Students will critically examine the role of political and economic factors in driving democratization as well as democratic backsliding, such as geography, education, and inequality.
4. Students will examine how citizens effectively influence political outcomes in non-democracies, as well as how nondemocratic leaders deal with diversity of opinion and dissent in making their decisions.

5. Students will read cutting edge research and develop a research idea focusing on the political economy of nondemocracy, which will serve as the basis of a paper.

Weekly readings and assignments

Lectures will be based in large part on a series of academic articles, most of which are already listed on the schedule below. Starred readings are considered to be required (subject to change). You are expected to read these *to the best of your ability* prior to each class so that you may participate in class discussions. To ensure this, I ask that you complete a “reading and analysis” assignment prior to each class to help facilitate discussion. As part of this assignment, you will briefly summarize **one** of the required articles’ arguments or main points, and generate two or so questions about or related to that article, which you can then pose during class. I ask that you email these assignments to me prior to each lecture, as part of your participation grade.

Presentations

Each week after the first week, at least one student will lead a 30 minute presentation on one of the readings. You may also present on an article that is not in the syllabus, subject to my approval. Grades will be based on both completeness (i.e. did you prepare to speak for the full 30 minutes?) and analysis (i.e. did you accurately summarize and interpret the article’s findings?). However, you may focus on different aspects of the paper of your choosing (for example, the institutional setting, the theory, the econometrics, possible extensions, criticisms, etc.). Non-presenters are expected to engage and ask questions. Additional instructions will be posted on Canvas.

Paper

A central part of this course involves the development of a research idea and corresponding essay. On May 10, you will complete and submit a final paper, consisting of a developed (i) research question, (ii) literature review, (iii) method of inquiry, as well as (iv) preliminary analysis, using data, historical evidence, and/or theory to test your research question. Additional instructions will be posted on Canvas.

Grades

Your grade will consist of a total of 100 points. Of these, 30 will be derived from the weekly written assignments summarized above. 20 will be derived from your presentation, also described above. 10 will be derived from participation. The remaining 40 will be derived from a ~ 20 page paper, which you will complete and hand in on the final exam date, May 10. You may select any (relevant) topic for this final paper, subject to my approval. Students in the writing-intensive portion should submit to me a ≥ 10 page draft at least two weeks prior to the due date, upon which they will receive feedback. In general, ≥ 93 points will guarantee an A, 90-92.5 an A-, 87-89.5 a B+, 83-86.5 a B, etc.

Attendance policy

As part of your participation grade, you should attend class and take notes so that you are aware of assignments and deadlines as well as any scheduling changes that may arise. Students should communicate to me via email when they will be absent and rely on office hours (please come see me!) as well as help from peers to fill in any blanks. Only a formal note from a doctor may qualify a student to delay any deadline.

COVID-19 policy

Given the discussion-based style of the course, lecture will be in-person only by default. We will move online only in the event of any college- or university-wide policy change regarding in-person lecture. If you are sick (with COVID or otherwise) and cannot attend, you will not be penalized. However, you will be expected to keep up with the reading material and rely on peers and office hours to make up for other missed course materials. Only a formal note from a doctor may qualify you to delay any deadline. Masks are required conditional on a university-wide mask mandate and optional otherwise. Failure to comply is a violation of the Code of Student Conduct and students will be subject to University discipline, which can include suspension or permanent dismissal. Please see tulane.edu/covid-19/health-strategies for University policies regarding COVID-19 testing and isolation. Masking and other COVID-19 policies are subject to change.

ADA/Accessibility

Tulane University strives to make all learning experiences as accessible as possible. If you anticipate or experience academic barriers based on your disability, please let me know immediately so that we can privately discuss options. I will never ask for medical documentation from you to support potential accommodation needs. Instead, to establish reasonable accommodations, I may request that you register with the Goldman Center for Student Accessibility. After registration, make arrangements with me as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion. Goldman Center contact information: goldman@tulane.edu, accessibility.tulane.edu, or (504) 862-8433.

Code of academic conduct

The Code of Academic Conduct applies to all undergraduate students, full-time and part-time, in Tulane University. Tulane University expects and requires behavior compatible with its high standards of scholarship. By accepting admission to the university, a student accepts its regulations (i.e., Code of Academic Conduct and Code of Student Conduct) and acknowledges the right of the university to take disciplinary action, including suspension or expulsion, for conduct judged unsatisfactory or disruptive.

Statement of equity, diversity, and inclusion

Equity, diversity, and inclusion (EDI) are important Tulane values that drive excellence in our learning environments and help us build a supportive culture and climate for every

member of our community. Diversity refers to many different identities and experiences that include the following and more: race, color, sex, religion, national origin, age, disability, genetic information, sexual orientation, gender identity, gender expression, pregnancy, marital status, military status, veteran status (or any other classification protected by applicable law). To live our values of EDI with one another, we acknowledge that each of us have areas of strength and growth in our EDI learning and competency that we each continuously work on to sustain EDI on our campus.

Religious accommodation policy

Per Tulane’s religious accommodation policy and our core values of diversity and inclusion, I will make every reasonable effort to ensure that students are able to observe religious holidays without jeopardizing their ability to fulfill their academic obligations. Excused absences do not relieve the student from the responsibility for any course work required during the period of absence. Students should notify me within the first two weeks of the semester about their intent to observe any holidays that fall on a class day or on the day of the final exam.
